L-3 Electron Technologies, Inc. Introduces Broadband Millimeter Wave TWT Amplifier

TORRANCE, Calif., June 11, 2008 – L-3 Electron Technologies, Inc. (L-3 ETI) announced today the introduction of its model 8928H 150W K-band Traveling Wave Tube (TWT) amplifier. Designed for electronic countermeasure and instrumentation applications, the new broadband TWT has a remarkably small footprint and weighs less than four pounds.

“The 8928H positions L-3 ETI to support our electronic warfare and instrumentation customers with market-leading broadband RF power spanning 18 to 50 GHz,” said Alan Piring, L-3 ETI’s vice president of military and telecom TWT products. “This important addition to our product offering enhances our expanding family of high-efficiency, high-power millimeter wave helix TWTs for SATCOM uplink, radar, electronic countermeasures and instrumentation applications.”

L-3 ETI’s model 8928H TWT operates at the 18.0 to 26.5 GHz frequency range and incorporates focus electrode modulation to allow both CW and pulsed operation. With this introduction, L-3 ETI now offers a full complement of broadband millimeter wave TWTs, including the 8929H 150W Ka-band TWT (26.5 to 40 GHz) and the 8905H-5 70W Q-band TWT (40 GHz to 50 GHz).

L-3 Electron Technologies, Inc. is a leading provider of space-qualified TWT, EPC and TWTA products and electronic propulsion systems as well as high-performance TWTs for surface and airborne satellite communications uplink, radar, electronic warfare and instrumentation applications.

To learn more about L-3 ETI, please visit the company’s Web site at www.L-3Com.com/eti.

Headquartered in New York City, L-3 Communications employs over 64,000 people worldwide and is a prime contractor in aircraft modernization and maintenance, C³ISR (Command, Control, Communications, Intelligence, Surveillance and Reconnaissance) systems and government services. L-3 is also a leading provider of high technology products, subsystems and systems. The company reported 2007 sales of \$14 billion.
