

HIGH REALISM SIMULATION & TRAINING

Complete Power Plant Simulations and Training for Better Training, Nuclear Personnel Development and Plant Engineering Support

Learning Modules

System Knowledge Modules

Learning Simulators

Classroom Simulators & Part-Task Trainers

Engineering Simulators

Full Scope Operator Training Simulators

Simulator Upgrades & Modifications

Immersive & Interactive 3D Visualization

For more than 45 years, L3 MAPPS has worked with leading utilities, plant designers and research organizations to create superior operator training simulators and simulators to assist and de-risk plant builds, and has established itself as the world's pre-eminent manufacturer of high-realism power plant simulators, which are powered by the L3 MAPPS' second-to-none Orchid® simulation environment. In addition, L3 MAPPS' 2D and 3D interactive early learning technologies are sure to increase your students' understanding and retention of power plant fundamentals.

L3 MAPPS has deployed the world's highest fidelity simulators for HWR, GCR, BWR and PWR nuclear plants. Our simulators are also used to support operator training at coal, oil & gas, GT and CCGT plants.

L3 MAPPS has vast experience in supporting New Build projects with its simulation solutions—resulting in significant error reduction in plant designs.

With L3 MAPPS learning technologies (Learning Modules, System Knowledge Modules and Learning Simulators), we capitalize on the use of interactive visualization to further the objectives of power plant training programs by adding another tool in the arsenal to improve or augment the learning experience with a higher degree of efficiency, retention and accessibility.

The superior training environments of L3 MAPPS simulators provide clear advantages for obtaining operator licenses/certification, optimizing plant operating procedures and reducing costs. Operators trained on L3 MAPPS simulator environments acquire the skills necessary to increase plant performance, minimize downtime, and provide confident emergency response.

USES AND ADVANTAGES

Cost-effective training for:

- Experienced operators and new recruits
- Overall plant and individual system operation and control
- Improved team interaction and performance
- Emergency plan implementation and incident management
- Command of malfunction and transient situations
- I&C familiarization

More benefits:

- Operations optimization, including start-up and shutdown
- Fewer unplanned outages
- Improved plant safety
- Analysis of plant response to equipment and/or instrument failure
- Efficient plant design planning and upgrading
- DCS and plant process computer verification and validation
- Ease of simulator upgrade and ability to keep current with plant
- Multiple configurations on one simulator
- Portability of simulation for classroom training

HIGH REALISM SIMULATION & TRAINING

Complete Power Plant Simulations and Training for Better Training, Nuclear Personnel Development and Plant Engineering Support

L3 MAPPS entered the power plant simulation business in 1973. Today, L3 MAPPS is the world's foremost supplier of high-end full scale simulators for nuclear power plants of most manufacturers, as well as simulation solutions for coal, oil, and gas fired power plants. L3 MAPPS' Power Systems and Simulation business is known for its customer-centric approach, technological superiority and value-added service in delivering best-in-class power plant simulators. Following is a sample of our customers globally.
